

Paper
MARKETING OF SERVICES

MBA IV SEMESTER (CBCS)

(Batch 2018-2020)

Lecture on

Classification of Services

Faculty

Dr. Kamran Sultan

Pandit Jawaharlal Nehru Institute of Business Management

Vikram University Ujjain (M.P)

Classification of Services

- ▶ It is possible to carry out a **classification of services** based on two general dimensions such as what is being processed, whether is it a person or an object, and how is it being processed?
- ▶ In other words, what is the nature of the process tangible or intangible actions.

Services based on Intangibility

There are objects in this world which cannot be tangibly quantified. For example -

- ▶ The number of algorithms it takes to execute your banking order correctly,
- ▶ The value of your life which is forecasted by insurance agents.
- ▶ These services are classified on the basis of intangibility.

Services based on Intangibility

- ▶ **Services directed at people's mind -**

Services sold through influencing the creativity of humans are classified on the basis of intangibility.

- ▶ **Services directed at intangible assets -**

Banking, legal services, and insurance services are some of the services most difficult to price and quantify.

```
graph TD; A[• Intangible actions] --> B[Services directed at people's mind]; A --> C[Services directed at intangible assets]; B --> D[• Education<br>• Theatres<br>• Information services]; C --> E[• Banking<br>• Legal services<br>• Insurance];
```

- Intangible actions

Services directed at
people's mind

- Education
- Theatres
- Information services

Services directed at
intangible assets

- Banking
- Legal services
- Insurance

Services based on Tangibility

Wherever people or products are involved directly with the services offered the service classification can be done based on tangibility.

The examples of such services are as follows:

- ▶ **Services for people** - Like Health care, restaurants and saloons, where the service is delivered by people to people.
- ▶ **Services for goods** - Like transportation, repair and maintenance and others. Where services are given by people for objects or goods.

Tangible actions

```
graph TD; A[Tangible actions] <--> B[Services for people]; A <--> C[Services for goods]; B --- D["• Health care<br>• Restaurants<br>• Saloons"]; C --- E["• Transportation<br>• Repair and maintenance<br>• Dry cleaning"];
```

Services for people

- Health care
- Restaurants
- Saloons

Services for goods

- Transportation
- Repair and maintenance
- Dry cleaning

The background features abstract green geometric shapes, including triangles and polygons, in various shades of green, some overlapping. The shapes are primarily located on the right and bottom edges of the slide.
