NAAC "A" GRADE UNIVERSITY

ENVIRONMENT POLICY

ENVIRONMENT POLICY

The Vikram University has a **Green and sustainable growth Approach**. Adoption of environment friendly lifestyle and maintaining a pollution-free campus is an integrated activity of the University. Environmental concerns find top priority in campus activities with universal approach of '**Think Globally and act Locally**'. In order to keep eco-friendly and sustainable natural eco-system, Vikram University has a well-defined environmental policy. The policy incorporates several directives, measures and appeals which are listed below;

- The University defines a green campus not just with a green landscape but includes green architecture, sustainable and judicious use of natural resources, recycling of solid and liquid waste and promotion of organic practices.
- Three R's (Reduce, Reuse and Recycle) policy will be adapted for Zero waste generation and management.
- The University will strive for reducing carbon, energy and water footprints in the campus.
- The use of solar energy will be promoted and energy-efficient electric appliances will be deployed.
- The University will widely use rainwater and roof water harvesting vis-à-vis conservation and augmentation of water resources.
- The University will make arrangements for the segregation of waste materials and will arrange for either its recycling or disposal at earmarked sites,
- The University will promote green fuel vehicles including restricted use of vehicles in campus.
- The University campus will be kept polythene free and, reusable cotton bags will be promoted.
- As per its IT Policy, the University will strive for a paperless office thus, reducing paper and other stationary waste materials.
- The University will promote research in grass and weeds including initiating short-term related entrepreneur courses.
- The University will protect and enhance biodiversity.

- University provides a natural habitat to National Bird Peacock. The plan to conserve this beautiful bird including other flora and fauna in the campus will be implemented.
- The University will arrange regular seminar/symposia/workshop/street play etc. to create environmental awareness among the students and staff.
